CARTRIDGE FILTERS

Nanofiber features and benefits

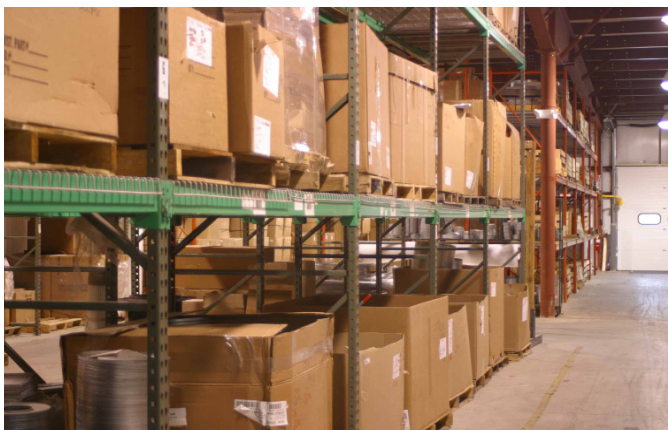

Nanofiber filtration is the future of dust collection, and RockRidge offers a wide range of filters using nanofiber media. Cartridge filters that use nanofiber will help your company stay up and running for longer periods of time. RockRidge's Nanofiber filters offer a longer life, which results in less filters purchased, less labor during changeouts, less production downtime. All of these factors will help your company where it matters most- the bottom line.

Standard Medias

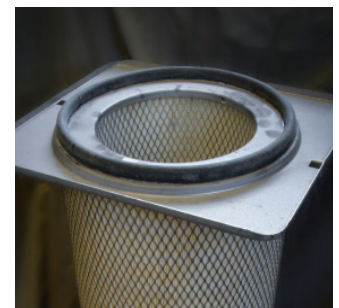

Media		Applications
80/20	11	General Dust Collection
Spunbond	12	Concrete, High Moisture, High Abrasion
Nanofiber	15	Plasma, Laser Cutting, Fine Particles
Spunbond PTFE	16	High Moisture, Any Ultra Fine Particles

All medias are MERV rated using ASHRAE 52.2 Standard.

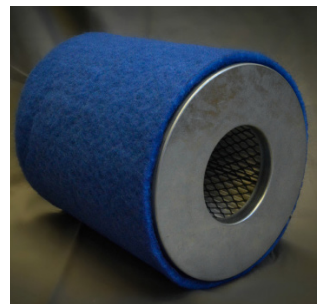

Large inventory for expedited shipping

Thousands of available cartridges

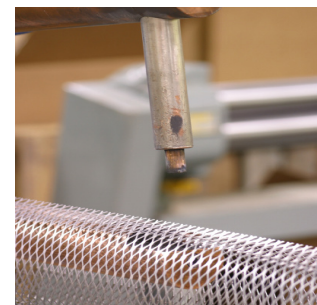

Replacement filters for all major OEMs

Sewing line for filter wraps

Adjustable pleated media

Precision, high quality welding and manufacturing

The filters you need- when you need them!
