

RockRidge Garnet

Waterjet Cutting Abrasive

*Consistent Quality. Clean Results.
Trusted by Professionals.*

Pure Premium Hard Rock Crushed Garnet.

RockRidge only offers a premium product that is harder, sharper and cleaner to optimize your water jet cutting process. The crushing process results in a sharper, angular grain that has multiple benefits for the customer.

KEY BENEFITS

- Sharper Edges
- Faster Cutting
- Better Edge Quality
- Increased Throughput
- Less Dust

Partnering with Customers in the Waterjet Industry to Improve Their Overall Process Through Quality, Support and Supply Chain Consistency.

RockRidge	Performance Characteristics	Products	Orifice Diameter	Nozzle Diameter
Premium crushed hard rock garnet for an improved water jet cutting process with less dust and nozzle clogging.	Provides optimal performance in thicker, hard to cut materials. The sharper angular grains result in faster cutting speeds and improved edge quality.	RockRidge 120	.007 - .010	.020 - .030
		RockRidge 80	.010 - .014	.030 - .040
		RockRidge 50	.012 - .018	.040 - .060
